

Dr. Kahlil Permenter, DC

A lifelong athlete and movement enthusiast, Dr. Kahlil Permenter's path to chiropractic began with helping friends and family improve their performance and well-being. As their needs became more complex, he pursued deeper training to serve them fully, ultimately becoming a chiropractor. Today, he blends clinical skill with a coach's mindset, empowering patients to move better, feel stronger, and take command of their health.

Dr. Kahlil believes prevention is the foundation of wellness: quality movement, whole-food nutrition, and a supportive environment that challenges you, then gives space to recover. His care focuses on restoring pain-free function, teaching practical habits, and giving patients the knowledge to lead their own health journey.
